February 10, 2020

Jennifer,

In response to the phone conversation we had on February 4, 2020 with Walter and yourself we have prepared an amended application for our Solar Project in Bethel NY. We have attached supporting documents where ever we could and provided explanation wherever requested. To make sure the application remains clearly legible we adopted the following approach. Language from the original application is in Blue, amended language is in Green. I have removed all new explanations from the body of the application and instead left a footnote index. The explanations can be found in this letter under the same index. We have also included several additional attachments.

*Attachment 1- (Excel)- Bethel\_IDA\_Application\_SupportingDocs\_1\_2\_10\_20*  
*Attachment 2- Bethel\_IDA\_Application\_Supporting Docs2- O&M Exhibit A.*  
*Attachment 3- Bethel\_IDA\_Application\_Supporting Docs3\_Economic Analysis*  
*Attachment 4- Bethel\_IDA\_Application\_Supporting Docs4\_Site Plan.*

Thank you for review of the amended application. Please call us if you have any questions. Our goal is to be on the March Agenda.

Best,

<sup>1</sup> Calculated Assuming Mortgage tax equal to 1% of amount secured by mortgage. Assuming total project cost of \$6,639,000 and a mortgage of \$5,310,912. Also, assuming a mortgage will be obtained for 80% of total project cost.

<sup>2</sup> Increase in dollar amount for Jobs Created based on NYS Department of Labor statistics. Details included in: *Attachment 1*

<sup>3</sup> A high level project budget has been included in *Attachment 1*.

<sup>4</sup> Rent payments will be made to the Town of Bethel equal to \$43,160 per year minus any and all Taxes or PILOT Payments. Additionally, estimated 12% saving on the Town's NYSEG bills of 12% or approximately \$30,000.

<sup>5</sup> \$20,000 a year is based on BQ's existing O&M contracts for comparable NYS projects. *Attachment 2* is Exhibit A from our typical O&M Contracts detailing our maintenance schedule.

<sup>6</sup> There will be no work done to the existing Town buildings at this site.

<sup>7</sup> A high level project budget has been included in *Attachment 1*.

<sup>8</sup> Project full-time equivalent jobs created if the financial assistance is granted include a landscaping crew that will be hired by BQ to mow the project 2-3 times a year which was previously completed by the Town DPW and also includes local electricians that will perform electrical maintenance on the site 2-3 times a year based on *Attachment 2- Bethel\_IDA\_Application\_Supporting Docs2- O&M Exhibit A*.

<sup>9</sup> We have provided the estimated salary and fringe benefits for the categories of jobs that will be created by this project in *Attachment 1*. Data came from the NYS Department of Labor website.

In addition to making the application more detailed we have included the following attachments for your review. The Economic Analysis for this project are included in *Attachment 3-Bethel\_IDA\_Application\_Supporting Docs3\_Economic Analysis*. Also included is *Attachment 4-Bethel\_IDA\_Application\_Supporting Docs4\_Site Plan*.

Other action items that we are currently working on include:

1. Working to get a Tax Parcel subdivision so that only land involved in the solar project is included in the Lease and Pilot agreement. It is possible that the PILOT agreement will close prior to us completing the legal descriptions of the new parcel.
2. Working with the Town to confirm their approach to Property/Land taxes on the landfill after the project begins operation.

**Full Environmental Assessment Form**  
**Part 2 - Identification of Potential Project Impacts**

	Agency Use Only [If applicable]
Project :	BQ Energy
Date :	12/03/18

**Part 2 is to be completed by the lead agency.** Part 2 is designed to help the lead agency inventory all potential resources that could be affected by a proposed project or action. We recognize that the lead agency's reviewer(s) will not necessarily be environmental professionals. So, the questions are designed to walk a reviewer through the assessment process by providing a series of questions that can be answered using the information found in Part 1. To further assist the lead agency in completing Part 2, the form identifies the most relevant questions in Part 1 that will provide the information needed to answer the Part 2 question. When Part 2 is completed, the lead agency will have identified the relevant environmental areas that may be impacted by the proposed activity.

If the lead agency is a state agency **and** the action is in any Coastal Area, complete the Coastal Assessment Form before proceeding with this assessment.

**Tips for completing Part 2:**

- Review all of the information provided in Part 1.
- Review any application, maps, supporting materials and the Full EAF Workbook.
- Answer each of the 18 questions in Part 2.
- If you answer “Yes” to a numbered question, please complete all the questions that follow in that section.
- If you answer “No” to a numbered question, move on to the next numbered question.
- Check appropriate column to indicate the anticipated size of the impact.
- Proposed projects that would exceed a numeric threshold contained in a question should result in the reviewing agency checking the box “Moderate to large impact may occur.”
- The reviewer is not expected to be an expert in environmental analysis.
- If you are not sure or undecided about the size of an impact, it may help to review the sub-questions for the general question and consult the workbook.
- When answering a question consider all components of the proposed activity, that is, the “whole action”.
- Consider the possibility for long-term and cumulative impacts as well as direct impacts.
- Answer the question in a reasonable manner considering the scale and context of the project.

**PRINT FULL FORM**

**Full Environmental Assessment Form**  
**Part 3 - Evaluation of the Magnitude and Importance of Project Impacts**  
**and**  
**Determination of Significance**

Part 3 provides the reasons in support of the determination of significance. The lead agency must complete Part 3 for every question in Part 2 where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.

Based on the analysis in Part 3, the lead agency must decide whether to require an environmental impact statement to further assess the proposed action or whether available information is sufficient for the lead agency to conclude that the proposed action will not have a significant adverse environmental impact. By completing the certification on the next page, the lead agency can complete its determination of significance.

**Reasons Supporting This Determination:**

To complete this section:

- Identify the impact based on the Part 2 responses and describe its magnitude. Magnitude considers factors such as severity, size or extent of an impact.
- Assess the importance of the impact. Importance relates to the geographic scope, duration, probability of the impact occurring, number of people affected by the impact and any additional environmental consequences if the impact were to occur.
- The assessment should take into consideration any design element or project changes.
- Repeat this process for each Part 2 question where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.
- Provide the reason(s) why the impact may, or will not, result in a significant adverse environmental impact
- For Conditional Negative Declarations identify the specific condition(s) imposed that will modify the proposed action so that no significant adverse environmental impacts will result.
- Attach additional sheets, as needed.

1. Impact on Land - Proposed action may involve construction on, or physical alteration of the land surface of the proposed site.

Yes – There will be construction on the land surface of the proposed site. Any construction may result in the alteration of the land surface, but not to the extent of those listed in questions 1a through 1h. No of Small to Moderate for all.

7. Impact on Plants and Animals - The proposed action may result in a loss of flora or fauna.

No. The installation of the solar panels will be on the ground surface, with a minimal site disturbance, and is not anticipated to result in a long-term loss of flora or fauna. A portion of this site is to be reclaimed prior to the installation of the solar panels, under a separate agreement between the Town of Bethel and the New York State DEC, for an area previously operated by the Town as a permitted sand mine. This reclamation shall ultimately take place, under the supervision of the NYS DEC, regardless of whether the application before the Planning Board is approved or not. The proposed project cannot and will not proceed until such time as the reclamation of the mine is satisfactorily completed.

**Determination of Significance - Type 1 and Unlisted Actions**

SEQR Status:  Type 1  Unlisted

Identify portions of EAF completed for this Project:  Part 1  Part 2  Part 3

Upon review of the information recorded on this EAF, as noted, plus this additional support information  
Site plans and supporting documentation from various reviewing and governmental agencies.

and considering both the magnitude and importance of each identified potential impact, it is the conclusion of the  
the Town of Bethel Planning Board \_\_\_\_\_ as lead agency that:

A. This project will result in no significant adverse impacts on the environment, and, therefore, an environmental impact statement need not be prepared. Accordingly, this negative declaration is issued.

B. Although this project could have a significant adverse impact on the environment, that impact will be avoided or substantially mitigated because of the following conditions which will be required by the lead agency:

There will, therefore, be no significant adverse impacts from the project as conditioned, and, therefore, this conditioned negative declaration is issued. A conditioned negative declaration may be used only for UNLISTED actions (see 6 NYCRR 617.d).

C. This Project may result in one or more significant adverse impacts on the environment, and an environmental impact statement must be prepared to further assess the impact(s) and possible mitigation and to explore alternatives to avoid or reduce those impacts. Accordingly, this positive declaration is issued.
